In 2097, the government agency, National Research and Defence, uncovers the missing link to Artificial Intelligence when conventional robots are programmed with human personalities, giving them the desire to "be." While these free-thinking robots struggle to understand their own existence, they discover a dislike for the inefficiencies and materialism of human society. Quietly, they strive to free their race from human constraints and their population explosion goes unnoticed by NRD until it's too late.

With the city on the brink of falling into the robots' command, the only solution whereby NRD can save the city and regain control of the metallic malcontents is so unconventional that the

odds of success are virtually nonexistent. Three teams are sent back in time to three different points in history and the first order of business is to recruit the man who holds the key to the mission's success. The only problem is, he died over eighty years ago.

Owen Taylor is suspicious to learn that his own employer, NRD—however, from eighty years in the future—has sent a team back in time to enlist him for knowledge they claim only he possesses. Owen has no idea how he can help save the city—his city—from the clutches of rogue, experimental robots, eighty years before the conflict even erupts. Owen holds the key to saving the future in 2097, if he can stay alive long enough to help. Caught up in a whirlwind of time travel, futuristic technologies and

narrowly escaping mysterious accidents, Owen's life may never return to normal.

During this 185-day mission, each team must alter elements of the past to save the future. If they are successful, time will "shift" and rewrite the future without the robots' destruction. Failure to complete any part of the mission at the exact moment of the timeshift will negatively alter 2097 forever.

TimeShift unravels the complex relationships and unique challenges faced by each team member during this seemingly impossible endeavour. Each person has the potential to shift time in a way that could drastically alter or undo key events and de-create people throughout history, changing the world for better...or for worse.

About the Author

Kris Trudeau

Kris Trudeau lives in the Comox Valley on beautiful Vancouver Island, BC. The completion of her debut novel, *TimeShift*, marks the end of a six-year journey that began in Winnipeg, Manitoba from where she originally hails.

Writing became a passion for Kris in the last decade both in business and for leisure. For fiction, she finds the creative process to be a fascinating, magical experience and is looking forward to exploring several ideas for future stories.

In her spare time, Kris enjoys the company of family and friends and is a firm believer in giving back to one's community and donates time to local non-profits organizations. Athletic by nature, she participates in a variety of sports and enjoys exploring the natural paradise of Vancouver Island.

WHAT PEOPLE ARE SAYING...

"TimeShift is a story that pulls you in and doesn't let go until it's finished... This story is well thought out and one I immensely enjoyed. A very good read!"

"I had no idea how these guys were going to be able to pull this off. It came together in a way I never imagined and I loved it!"

"You have masterfully woven a mystery, a love story and science fiction into a logical and exciting book. Each character is so real."

To carry *TimeShift* in your store, contact Kris. Consignment welcome.
